## PKCS#11 R2 Mechanisms and Functions

### 1 PKCS#11 Mechanisms

The following tables are based on PKCS#11 specification version 2.20 and its amendment 3, version 2.30 draft and version 2.40. All mechanism-function-combinations defined by the standard and supported by SecurityServer 4.01 are marked with a ✓ character. All mechanism-function-combinations defined by the standard but not supported by SecurityServer 4.01 are marked with – characters. Empty mechanism-function-combinations are not defined by the standard.

All Vendor Defined Mechanisms provided by SecurityServer 4.01 are listed on the last page of this section.

Supported mechanisms are supported by Utimaco PKCS#11 R2 implementation on all CryptoServer hardware platforms.

The list of supported mechanisms in SecurityServer 4.01 is the same as for SecurityServer 3.30/3.21/3.20.
